

James Boland

Junior Full Stack Developer

SUMMARY

- Dedicated and eager full stack junior developer with a taste for front-end development and an ever-growing interest in backend technologies.
- Proven experience in the development of full stack dynamic web applications from idea to deployment.
- Seeking to join a team that values continuous learning, and encourages professional growth and team collaboration.
- Experience in building responsive, visually appealing front-ends with consideration of UI/UX principles.
- Strong team player with effective inter-team communication and experience in remote project collaboration with git version control.
- Genuine passion for learning with a love for bringing ideas to life.
